

Solar Turbines

Wednesday, September 23, 2009, 11:45 – 1:00 pm

Solar Turbines is a world-leading producer of mid-range industrial gas turbines for use in power generations, natural gas compression and pumping systems. It provides full product support, equipment supply, and financing, plus installation, operation, and maintenance capability. All of Solar's facilities place high priority on health and safety performance, and many of its facilities have received awards for safety and environmental management. High priority areas are risk reduction and injury prevention. During this tour, you will see how this manufacturer manages its safety and health compliance.
